2027 WHAT'S NEW

MXZ X-RS Renegade X-RS Backcountry X-RS

X-RS
20TH ANNIVERSARY

The X-RS package celebrates 20 years of proven race-winning features that crowned multiple champions across snowmobile racing. The 20th Anniversary X-RS package with special features available on MXZ, Renegade and Backcountry models.

REV GEN5 – SKANDIC AND TUNDRA

Now on the advanced REV Gen 5 platform, Skandic and Tundra utility snowmobiles provide refined work capability to make easy work of big jobs wherever they are. The uMotion rear suspension boosts capacity, control and comfort.

FREERIDE AND SUMMIT

Further lightened Summit and Freeride deep snow models raise the bar again. The Freeride's new and lighter 147x3.0-Inch track option adds monstrous traction and lighter handling. The new tMotion L/0 coil-over rear suspension, on Summit Expert and Freeride models, rebounds faster for easier lift out of snow and a lighter feel, while the fixed rear arm boosts stability and predictability on steep, technical terrain.

NEW 16" EXPEDITION LE

A new sport-utility crossover package to fill a gap between the Expedition Sport and the wide track Expedition LE. This snowmobile blends the ruggedness of the Expedition with top features for capable, refined performance - offering the best price-value in the sport-utility market.

ROTAX 600RR E-TEC ENGINE

The 600RR E-TEC sets a new standard with class leading 130 horsepower, ultra quick throttle response and advanced technologies, like Smart Eco Mode and Silent-Stop function* for improved fuel economy.

* on selected models

10.25" GROUP RIDE

With vivid graphics and a large screen, this advanced touchscreen display delivers all key info for the rider. Now in Europe, the Group Ride feature shows friends on the map without a cellular network or phone connection - perfect for on- or off-trail adventures.

NEW ACCESSORIES

GPS MODULE WITH GROUP RIDE

Locate your friends and other vehicles around on the map without a phone connection or cellular network. The new Group Ride Feature is a perfect addition for group adventures on or off-trail, offering extra peace of mind in the backcountry.

ADJUSTABLE HEATED BRAKE LEVER

3-position heated lever provides warmth in freezing weather. Toolless design adjusts easily with 6 increments. Shape and size is optimized for 1 or 2 fingers.

LINQ 60 L SPORT UTILITY CARGO BOX

Maximize adventure with this versatile cargo solution. Use it as weather-resistant, lockable storage, or remove the lid instantly for taller loads. Mount extra LinQ accessories on top for added capacity. Internal tie-downs keep gear secure on any ride. Durable and adaptable without compromise.

SKI-DOO X-RS
RACE TRACK DNA FOR THE TRAILS SINCE 2007

In the history of snowmobiling, there are moments that change the enthusiasts' perception of what is possible. One such significant milestone was reached in 2007, when Ski-Doo introduced the X-RS package. It was not just a new decal pattern or a marketing gimmick, but a promise of extreme performance. Since then, a large number of Ski-Doo models have proudly carried the X-RS badge, and these letters have become synonymous with uncompromising quality.

But what does X-RS actually mean? As the original idea summarizes, these are not "just sleds." They are masterpieces of engineering built with one clear philosophy: to bring winning race track technology directly to the reach of consumers.

MORE THAN THE SUM OF ITS PARTS

The core idea of X-RS models has always been "Race-to-Snow" – from the race tracks to the snow. When Snocross and Cross Country champions compete in extreme conditions on weekends, their sleds are put to a test that an ordinary trail sled could not withstand. Chassis bend, suspension is forced to work in fractions of a second, and handling must remain razor-sharp despite the fatigue.

X-RS models are built with these exact same features proven in competition. In practice, this means reinforced structures that withstand hard riding in bumps and jumps. It means industry-leading suspension – often the same KYB shocks used by professionals – with versatile adjustment possibilities. These are not compromises, but solutions tested and approved on the world's most demanding race tracks.

THE EXPERIENCE OF CHAMPIONS FOR EVERY RIDER

The biggest reason for the popularity of X-RS models, however, is the feeling they convey to the rider. The goal is to give every rider the opportunity to experience what Snocross and Cross Country champions experience every single race weekend.

This experience is a combination of control, adrenaline, and confidence. When you ride an X-RS-equipped snowmobile, you know that the machine's limits are far above your own. When the trail turns bumpy and others have to slow down, the X-RS comes to life. It swallows the irregularities in a way that makes the rider feel like a professional. The steering remains precise, and the sled reacts immediately to the smallest body movement.

It is the feeling of having a machine underneath you that is made to win. Even if the rider does not participate in competitions themselves, the knowledge that the sled is built to withstand race-level stress brings peace of mind for long and demanding adventures.

A LEGACY THAT CONTINUES

The journey that began in 2007 has brought us to a point where X-RS has established its place at the top of snowmobiling. It has set the standard for what is expected of a "race replica." It is not just a copy in appearance, but a copy in soul.

Every time a new Ski-Doo model is equipped with the X-RS package, it carries years of development work, thousands of test kilometers, and countless podium finishes. It is a tribute to those technical innovations that have enabled the sport to develop to its current point. X-RS is more than a model designation – it is an invitation to experience winter through the eyes of a champion.

MXZ
TRAIL

Superior trail agility paired with the sport's most advanced 2-stroke engines form the basis of every MXZ. Outfitted with industry-defining suspensions and features, every ride is an adrenaline-filled adventure.

See MXZ specifications on page 29.

EXODUS X-TEAM EDITION JACKET

Dominate the trails with a racing edge! The Exodus X-Team Edition Jacket delivers a high-performance look paired with superior warmth. Featuring 200g of Youngone Eco Loft Heat Soft® insulation and Radiant Core technology, it's engineered to maximize heat retention in the harshest conditions. 100% sealed seams and an insulated front flap ensure total wind and moisture protection.

Comfort is prioritized with a polar fleece lining, adjustable cuffs with thumbholes, and a removable collar for an extra seal against the elements. Stay visible with 360° reflective details and keep organized with multiple pockets, including a Napoleon pocket with a built-in goggle cloth. The women's version adds a removable hood for extra versatility. This PFAS-free, eco-conscious jacket is the ultimate choice for riders who refuse to compromise.

VASA + X-TEAM EDITION JACKET

Take your adventure further with the Ski-Doo Vasa + X-Team Edition jacket. Designed specifically for active crossover riders, this jacket combines elite weather protection with the innovative ExoFloat System. This lightweight, integrated flotation technology provides crucial assistance in the event of ice breakthrough without compromising comfort or breathability. Best of all, it features a self-floating style that doesn't require matching pants to function.

The 2-ply Sympatex® membrane ensures complete waterproof and windproof performance, while 200g of Youngone Eco Loft Heat Soft® insulation keeps the chill at bay. Smart features like underarm vents, eLinQ cable management, and a 2-way zipper enhance your riding comfort. For added safety, it includes reflective shoulder accents and an accessible whistle pocket. Fully seam-sealed and PFAS-free, the Vasa is the ultimate gear for those who push boundaries on the snow.

RAYVIK CARBON HELMET

Experience the pinnacle of lightweight protection. Weighing in at just 1150 g, the Rayvik features a premium Carbon Fiber Composite shell designed for the most demanding deep-snow riders.

Safety is reimagined. The helmet is equipped with the Mips® safety system to reduce rotational forces and innovative CONTEGO™ copolymer foam, providing superior impact absorption compared to standard EPS.

Ride hard, stay cool. Multiple airflow channels and a washable liner keep you fresh, while the Fidlock® magnetic buckle makes gearing up a breeze. It is fully compatible with the Vibe communication system and the Winter Magnetic Face Guard.

Complete your setup with the matching Rayvik Goggles (sold separately). Featuring a quick-change lens, 3D face foam, and a dual-material frame, they lock into the helmet for a perfect, gap-free seal. ECE 22.06 and DOT certified.

BC KONA COLLECTION

Uncompromising performance meets eco-conscious design. Whether you choose the technical One-Piece Suit or the dynamic Jacket and Highpants combo, the BC Collection is built for the deepest powder.

At its core lies the recycled Sympatex® membrane: 100% waterproof, windproof, and breathable. Critical areas are armored with reinforcement fabrics and CORDURA® for ultimate durability against trees and ice.

Engineered for the active rider, the series features backpack-friendly venting and premium YKK® AquaGuard® zippers. The Jacket introduces the innovative Radiant Electronics pocket to protect your device from the cold. The Highpants offer superior coverage with stretch waist panels, removable knee pads, and full-length side zips for easy access.

With 100% sealed seams, 360° reflective details, and a PFAS-free construction, the BC Collection keeps you dry, visible, and ready for the next line.

OXYGEN FLOW HELMET

The Ski-Doo Oxygen Flow Helmet represents a quantum leap in snowmobile gear technology. Designed for the demanding trail rider, it eliminates the need for a restrictive breath mask while providing an industry-leading panoramic field of vision. Built with a lightweight M-FORGE® Composite shell, it weighs approximately 1850 g (size Large) and features an aerodynamic shape specifically engineered to reduce neck fatigue during high-speed rides.

What sets the Oxygen Flow apart is its sophisticated ventilation system. The visor features adjustable vents that allow riders to regulate internal temperatures; testing shows a reduction of up to 10°C compared to non-vented options. For extreme weather control, it includes a removable rear curtain and a chin curtain to minimize air intrusion. The amplified heated visor with its pivot contact system works alongside a heated chamber for the retractable amber sun visor, ensuring your sight remains crystal clear even in the most humid or freezing conditions.

Modern riding demands modern connectivity. This helmet features a rear eLinQ magnetic connector for easy power management and a batteryless rear LED light for enhanced rider safety. The Noise Control System (NCS) effectively reduces ambient sound, while the helmet remains fully prescription-eyeglass friendly. It is also ready to receive a communication system and features a quick-release chin strap for convenience. With a 4-year limited warranty and a recyclable shell for minimal environmental impact, the DOT-certified Oxygen Flow is the pinnacle of performance and responsibility.

EXODUS COLLECTION

Gear up for the trail with the complete Exodus system—now updated and fully PFAS-free. Combining a sharp, race-inspired aesthetic with heavy-duty protection, this Jacket and Highpants combo is your ultimate shield against the cold.

Maximum warmth is the priority. Both pieces are packed with 200g of Youngone Eco Loft Heat Soft® insulation. The jacket enhances this with Radiant Core technology to reflect body heat, while the pants feature a polar fleece seat and pre-shaped, padded knees for superior comfort on long rides.

Defy the elements with 100% sealed seams and waterproof YKK® AquaGuard® zippers from head to toe. The jacket's removable collar and the pants' storm gaiters create an impenetrable seal against wind and snow.

Packed with smart features like the E-LinQ cable management system, underarm vents, and 360° reflective details, the Exodus collection delivers total performance and visibility for every mile.

SUMMIT NEO

MID-SIZED

A mid-size deep snow sled with a massive fun factor, Summit Neo+ is the perfect start to winter adventures with a reliable, 85-hp Rotax EFI engine and slimmed down ergonomics any rider can enjoy.

See Summit Neo specifications on page 31.

Summit Neo+
600 EFI - 85 Hp

KEY FEATURES:
- Compact ergonomics
- RAS™ 3 front suspension with 34" ski stance
- KYB 36 front shocks
- 146 x 15 x 1,75" Hurricane with FlexEdge™ track
- LED headlights
- Pilot™ DS 2 skis
- Electric starter

about MXZ Neo at
Ski-Doo.com/MXZ-Neo

MXZ NEO

MID-SIZED

An awesome trail sled with compact ergonomics that gives riders of any age a less intimidating experience with a full-size fun factor.

See MXZ Neo specifications on page 29.

MXZ Neo+

600 EFI - 55 Hp

KEY FEATURES:

- Compact ergonomics
- Neo rear suspension
- RAS™ X front suspension
- KYB 36 front shocks
- 120 x 15 x 1.25 Ripsaw† track
- LED headlights
- RER™ electronic reverse

MXZ 200

YOUTH

Youth sled for those who's Ski-Doo life is just beginning!
Youth snowmobile for the future pros!

KEY FEATURES:

- 192 cc 4-stroke engine
- A-arm front suspension with hydraulic twin tube shocks
- Slide rail rear suspension
- Tether switch
- Handlebar grips with handwarmers
